## 2. CITATIONS AND EXPLANATIONS

Claims 1-51, 77 and 78 lack novelty under PCT Article 33(2) as being anticipated by U.S. Patent No. 5,341,516 to Detweiler.

Detweiler discloses a method of performing an anastomosis comprising: juxtaposing two blood vessels to be anastomosed using a juxtaposition device, to a desired configuration in which at least one vessel is an end vessel; applying an adhesive to said vessels while they are in said configuration, said adhesive being sufficient to ensure both sealing and bonding of said two vessels to each other; and removing said juxtaposition device after said adhesive sufficiently sets (Column 6, line 56- Column 8, line 62).

Claims 1-81 lack novelty under PCT Article 33(2) as being anticipated by U.S. Patent No. 5,411,508 to Bessler et al.

Bessler discloses a method of performing an anastomosis comprising: juxtaposing two blood vessels to be anastomosed using a juxtaposition device, to a desired configuration in which at least one vessel is an end vessel; applying an adhesive to said vessels while they are in said configuration, said adhesive being sufficient to ensure both sealing and bonding of said two vessels to each other; and removing said juxtaposition device after said adhesive sufficiently sets (Column 17, line 56-Column 18, line 57). Bessler also discloses applying the adhesive using a port coupled to at least one scaffolding element, wherein applying the adhesive comprises using a plurality of nozzles arranged in a ring (ring of ports 460), and a suction port (38).

Claims 1-81 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
